

## INTERNATIONAL BATHROOM EXHIBITION 2024

### PRESS RELEASE

Full color approach for the new Master collection by Arbi Arredobagno

Arbi Arredobagno presents itself at the 2024 edition of the Salone Internazionale del Bagno with the new Master collection: a bold expression of creativity and innovation in the world of bathroom furnishings.

The soul of Master is outlined by the formal rigor of the monobloc furniture which blends harmoniously with the aesthetic refinement guaranteed by the colour, the absolute protagonist of the project. The combination of suspended geometries and vibrant shades create infinite scenarios for a bathroom environment full of emotions.

Every detail is taken care of with the utmost precision: from the particular 45° cut which gives to our proposal an aura of sophisticated elegance, to the integrated handle which, in addition, add a touch of style and guarantees greater ease of use.

The clear lines of the furniture, enriched with open compartments that add dynamism to the compositions, are dressed with refined accents thanks to the multiple finishes available. Among these, the new Bricks finish stands out as a distinctive element, creating a fascinating schematic play of shadows and perspectives that adds depth and visual meaning to the front.

The wide color palette - made up of 56 shades, including 4 metal nuances, to which is added the precious oak wood - makes the collection extremely versatile, suitable to satisfy every taste and furnishing style. In fact, this variety of options allows you to create customized configurations, characterized by original combinations of colors or finishes, all enriched by light graphic textures or warm veins. A compositional freedom that gives life to bathroom ambient with a strong aesthetic impact, where you can represent the uniqueness of your own way of being.

Through a combination of high-quality materials and meticulous attention to detail, the Master collection offers a superior aesthetic and functional experience. Thanks to its modularity in three different sizes and the introduction of new elements, Master is the ideal choice for designing a bathroom that goes beyond time and fashion.

Constant investments in Research and Development allow Arbi Arredobagno to offer increasingly innovative and rigorously Made in Italy models, which highlight the extreme design attention and great aesthetic refinement, to fully satisfy the requests of an expert and demanding customer.
