

INTERNATIONAL BATHROOM EXHIBITION 2024

PRESS RELEASE

Ibra Showers by Arbi Arredobagno:

customized solutions for complete and coordinated bathroom environments

Arbi Arredobagno, a solid and successful company present on the market for 35 years, constantly invests in research and innovation, in order to renew its projects and always have the best interpretation of the most contemporary trends. Aesthetics, attention to detail and high quality standards are the values that have always guided the company in proposing an innovative and totally made in Italy design.

With the aim of offering a complete and coordinated proposal, Arbi Arredobagno combines the bathroom furniture collections with the Ibra Showers programme, which includes: shower enclosures, shower trays, elegant and resistant covering panels, enveloping bathtubs, decorative radiators which spread a pleasant warmth and functional accessories. Their combination creates an atmosphere of comfort and well-being.

The range of shower enclosures has recently been expanded with the model Vento - available with sliding door or fixed side walk-in, with 8 mm thick glass to guarantee maximum resistance and stability - and with the new folding configuration of the range Best. This one is characterized by the absence of a frame and, thanks to the doors that totally fold on themselves and the elegant and essential design, represents the ideal solution for those who have little space, but do not want to renounce to a product with a great aesthetic result.

Thanks to the multiple possible configurations, also available for custom solutions, and to the refined selection of profiles and glass available, Ibra Showers enclosures satisfy every aesthetic, functional and architectural requirement, integrating harmoniously with the various furnishing choices.

The range of shower trays has also been recently expanded with the new Arya, Synthesis and Silk models, the perfect union between design and high quality materials. The stone-effect material Tekorstone® and the refined Tekor® with a smooth texture dress the new proposals enhancing their aesthetics and, at the same time, guaranteeing maximum functionality. In fact, these materials are antibacterial, anti-slip, anti-drip and easy to clean.

By combining Arbi bathroom furniture with Ibra Showers proposals, the customer will have the possibility of choosing a custom-made, fully coordinated solution, creating a bathroom where comfort and elegance coexist harmoniously. The company's extraordinary ability to work on custom items allows it to create projects at the service of stylistic beauty and functionality, satisfying every space need and aesthetic taste.

Passion, production excellence and high aesthetic value guide Arbi in creating "the oasis of well-being, where you can indulge in complete relaxation".
